

# PASTA DİLİMLEME MAKİNASI UFC-P5 CAKE SLICING MACHINE

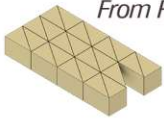

Cutting Forms

**SONIKEL**  
**ULTRASONICS**

Computerized Precise  
Slicing

From Rectangle Cake To Triangle and Rectangle Slices

From Circular Cake To Triangle Slices

## TEKNİK ÖZELLİKLER

|                         |                                                                                                                                          |
|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Frekans</b>          | 20kHz                                                                                                                                    |
| <b>Çıkış Gücü</b>       | 2500W                                                                                                                                    |
| <b>Besleme Gerilimi</b> | 230V / 50-60Hz                                                                                                                           |
| <b>Ayar Opsiyonları</b> | Kesim Süresi / Kesim Boyu / Reçete Hafızası<br>Bıçak Hareket Hızı / Dilim Genişliği / Kesim Tipi<br>Üçgen / Kare / Dikdörtgen / Yuvarlak |
| <b>Kesim Tipleri</b>    |                                                                                                                                          |
| <b>Pasta Ölçüleri</b>   | 300mm Yuvarlak, 400x600mm Dikdörtgen                                                                                                     |
| <b>Bıçak Genişliği</b>  | Max 500mm                                                                                                                                |
| <b>Kontrol Çıkışı</b>   | Akım ve Gerilim Koruması                                                                                                                 |
| <b>PLC Kontrol</b>      | Ready / Overload / Start / Sensör Bilgileri                                                                                              |
| <b>Operatör Paneli</b>  | Mevcut                                                                                                                                   |

## TECHNICAL SPECIFICATIONS

|                        |                                                                                                      |
|------------------------|------------------------------------------------------------------------------------------------------|
| <b>Frequency</b>       | 20kHz                                                                                                |
| <b>Output Power</b>    | 2500W                                                                                                |
| <b>Mains Supply</b>    | 230V / 50-60Hz                                                                                       |
| <b>Settings</b>        | Cutting Time / Cutting Length / Slice Width<br>Cutting Forms / Blade Movement Speed<br>Recipe Memory |
| <b>Cutting Forms</b>   | Triangle / Square / Rectangle / Circular                                                             |
| <b>Cake Dimensions</b> | 300mm Circular, 400x600mm Rectangular                                                                |
| <b>Blade Width</b>     | Max 500mm                                                                                            |
| <b>Control Output</b>  | Current and Voltage Protection                                                                       |
| <b>PLC Control</b>     | Ready / Overload / Start / Sensor Information                                                        |
| <b>Operator Panel</b>  | Available                                                                                            |

Yenilikçi Ultrasonik  
Çözümler

Innovative Ultrasonic  
Solutions

**SONIKEL**  
**ULTRASONICS**

*Sonikel Ultrasonic offers machinery and automation solutions that perform plastic welding and ultrasonic cutting using ultrasonic technology in accordance with the needs of our valued customers.*

*With the technical service and spare parts departments, the principle of its customers to provide the post-sales satisfaction. The understanding of service is based on the principle of being in the customer after the sale as in sale.*

*With its innovative structure and R&D power, it develops economic and effective solutions to the different problems of the industry.*

**Our Products Are In Service  
Worldwide**

Spain    Egypt    Poland    Iran    Pakistan  
Tunisian    Morocco    Slovenia    Iraq    Vietnam
